

Catering Video Transcript

[Chantelle] My name is Chantelle and I'm studying Catering Entry Level 3.

[On staff] They give you as much help as they need, and they know how to do stuff for you.

[On enrichment] For the enrichment, there's singing, there's walking, there's cooking as well.

[On future plans] There's a lesson called employability, and then they can give you lots of advice for the future, and know what to do. To be honest, I am going to do a couple more years in catering and then go for a job like a confectioner. I want to do a job that I love and I enjoy catering so...

[On college life] So, basically, when I first came into the college I needed a bit of help with directions and whatever, but, once you're in the college, like in the next couple of weeks, you'd know what routine you are in. I've made so many friends in this college straight away. I even added them on social media, like, everyone's just so nice in this college.

Id recommend it because, like, because, I have special needs and, like, you will make a lot of friends straight away. As soon as I came into this college, it just made me feel so comfortable. It's like my second home really.
